**RED STATUS INDICATOR LIGHT**

1. On steadily if switch is on and controller is operating normally.
2. Flashes steadily when in **HOLD**.
3. If there is a problem with the wiring or motor, the light will flash to indicate the system status:
   - Flash once, pause, flash once, pause, etc. → Open circuit, check motor leads.
   - Flash twice, pause, flash twice, pause, etc. → Thermal overload due to shorted motor or motor leads, check motor wiring.

If other system problems occur, please count the number of flashes to help with troubleshooting.

To clear a fault code, cycle power with the controller **ON/OFF** switch.

For troubleshooting, contact Schaffert Mfg. 308-364-2607

**Extended Warranty Option**
It's simple! Just complete the registration for this product ONLINE at www.micro-trak.com and we'll extend your warranty for up to three years*, at no additional charge.

Registration information is for internal use only.
* Some limitations apply. See warranty statement for details.

**WARNING:** DO NOT connect the motor leads (orange and blue wires) to the battery or power supply. Non-warranty damage will result if the motor leads are connected to the battery or power supply.

**DO NOT** ground motor to metal
**DO NOT** ground controller to metal
Always run power cable to battery
Controller controls speed of pump and pressure to rows or orifices
Grounding motor or controller can damage the controller
